

Verification of Identity made simple.

Simple. Secure. Native.

InfoTrack's VOI application IDfy provides an easier way to perform verification of identity checks and comply with Land Registry requirements.

What can IDfy do for your business?

Save time by eliminating the need to photocopy, scan and file identity documents

Enable any of your employees to easily perform VOI checks in line with VOI Standard

Provide peace of mind that you've taken 'reasonable steps' to verify

Produce consistent and comprehensive VOI reports

Securely store your VOI information for 9 years

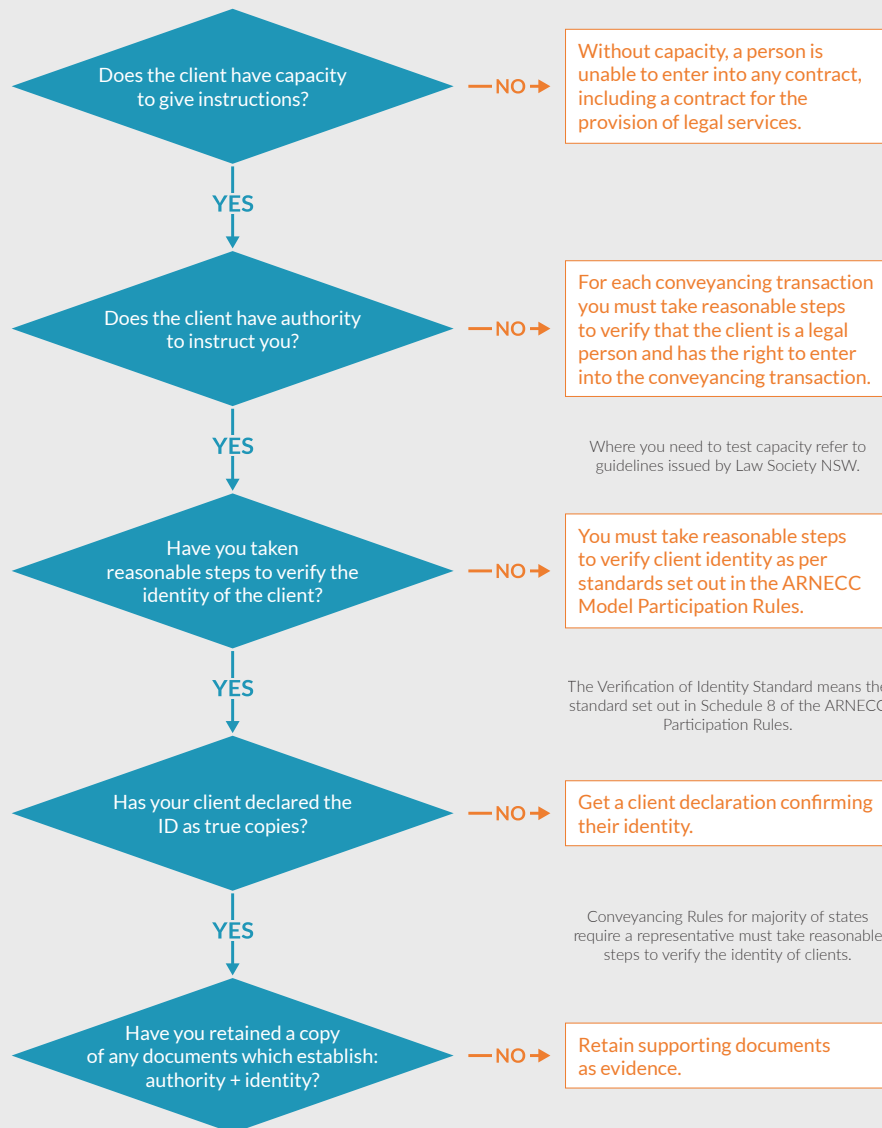

Allow for VOI of remote clients through the video calling feature

Verification of identity legislation updates

State Land Registry requirements across Australia are changing to ensure that lawyers and conveyancers conduct due diligence to identify their clients. InfoTrack is leading the charge to help practitioners comply with regulations and be confident they're taking reasonable steps to verify the identity of their clients.

Are you conducting due diligence verifying your client?

Download IDfy today and begin your journey of taking reasonable steps to verify the identity of your clients through our mobile application from the comfort of your office.

“IDfy has significantly improved and sped up the VOI process for us. IDfy is simple to use - anyone in the office can perform VOI. I would strongly recommend IDfy for any firms out there who are struggling to come to terms with the new VOI requirements or looking for an easy process to perform VOI checks.”

David Natoli,
Solicitor at Natoli Howell

“IDfy is an easy-to-use and convenient way to verify the identity of clients and securely store all VOI data. With a simple setup and step by step prompts throughout the process, our firm’s staff can easily verify our clients within minutes without missing any important information.”

Maria Menelaou,
Conveyancer/Legal Assistant at Bailey Timms

* IDfy is compatible with iPhone 4s and above and iPad running Apple iOS version 8.4 and above. IDfy is also available for Android.
